

William Barnhart Van Valin II, M.D.

CHIEF MEDICAL OFFICER

Dr. Van Valin joined EPH Technologies as Chief Medical Officer November 1, 2013. He was handpicked for the position by Michael Saunders for his very specific qualifications. They include being perfectly fluent in Spanish and for being licensed to practice medicine in the US and Mexico, having been boarded in both countries. He stepped in just as the clinical trials on our product were being completed and very quickly solved the issues we had stemming from the language barrier we were all burdened with for the last 2 years. At the same time he solved another problem we were having in getting our product safely through customs to its destination in Mexico City.

Dr. Van Valin is a Family Practice Physician specializing in bio-identical hormone replacement. He is also a published author of the book 'Private Conversations in Neverland With Michael Jackson' which details the five years he and Michael spent together as best friends in the Santa Ynez Valley in California.

Dr. Van Valin practiced as an Emergency Room Physician for 5 years, an urgent care physician for 8 years and for the last 10 years has been in private practice, holding the position of Medical Director of the Buellton Medical Center in Buellton California.

At present, Dr. Van Valin is seeing to it that our product gets through the difficult permitting process that will allow Protenza to be permitted for legal distribution throughout Mexico with the rest of the world to follow. Upon receipt of these permits, Dr. Van Valin will be setting up specific disease targeted clinical trials, using Protenza, in Mexico. He is of the opinion, based on the clinical trial information from Mexico and his own office based experience with our products that we have only just scraped the surface of the benefits Protenza can provide for the disease states inherent to the human condition. Its applications are appearing to be boundless.
